

# Considering an application of **PRE-HARVEST GLYPHOSATE?**

**Applying pre-harvest glyphosate too early can leave unacceptable product residues and put the marketability of your crop at risk.**

# **WAIT...**

**UNTIL YOUR CROP IS LESS THAN 30% GRAIN MOISTURE IN THE LEAST MATURE AREA OF THE FIELD.**

Check out the pulses staging guide at [keepingitclean.ca/glyphosate](http://keepingitclean.ca/glyphosate)
